## You're your own best teacher: A Self-Supervised Learning Approach For Expressive Representations

Johan Vik Mathisen

May 12, 2024

## 0.1 Stage 1

- 0.1.1 Reconstruction
- 0.1.2 Classification

## 0.2 Stage 2

## **TODO:** Thought:

Better inception score and CAS of our models indicate that the class separability learned in latent space makes the conditional distributions more distinct easier to classify. The FID is variable, but in many cases better, which indicated that the generative distributions are closer to the ground truth.
